

Quadz!

Quadz is a Nintendo Entertainment System port of the game Squarez. You get a random 3x3 tetris-like piece, and have to place it somewhere in your game area before the timer runs out!

When you form a completely filled 3x3 square it is removed from the game area. The more you get at a time, the more points you get!

When playing against an opponent, clearing large areas will move the dividing wall closer to their side, making your inevitable victory that much closer.

Controls

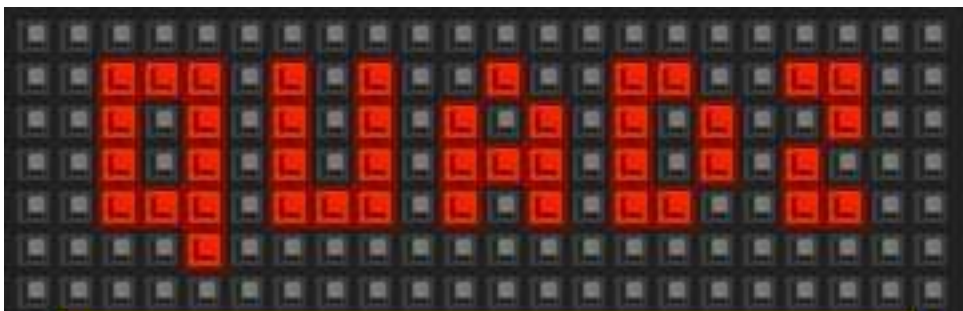

Move your piece
left/right and
up/down

Pause

Rotate piece
90° CCW

Place piece

Fight your opponent in this intense war for territory. Apply your battle plans by maneuvering your quadz into strategic locations. The more efficiently your troops can fight, the closer you become to victory.
